SIOEN
DIGITAL

SOL 64 XP

Sioen Digital™ unique new generation of Sol 64 XP inks have been specially formulated for all standard hard solvent printers listed. They offer a similar color gamut to OEM (see chart) and an improved adhesion and chemical resistance. Sioen Digital™ Sol 64 XP inks offer great performance on a wide variety of standard substrates, even at high speed printing. Sioen Digital™ Sol 64 XP is fully compatible with Seiko colorpainter S inks. There is no need to flush or spend costly time creating new profiles. You can use up your OEM ink and only replace cartridges individually or replace with a complete set of Sioen Digital™ Sol 64 XP.

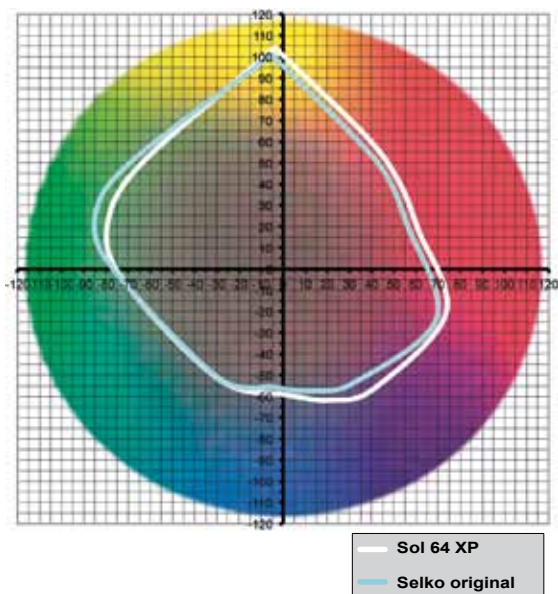

HARD- SOLVENT INKS FOR :

- Seiko™ S64,S100
- Océ™ CS6060,CS6100
- HP™ 9000,10000
- Konica™ based printers

FEATURES AND BENEFITS

Sioen Digital™ has designed the Sol 64 XP inks to interact perfectly with the Seiko™ Colorpainter 64S and 100S printers:

- Increase productivity through high speed printing
- Reduce significantly cost of printing without sacrificing time and quality
- Ink stability
- Color gamut similar to OEM
- Ink compatibility with OEM
- Outdoor durability without lamination: similar to OEM
- Original profile can be used
- 100% compatibility with original printer components
- Will not cause clogging and misfiring
- Nano size pigment particles produced with cutting edge technology
- Alcohol and water resistance
- Small ink particle size for keeping the print-heads clean
- Optimal drying time compatible with high speed printing modes
- Excellent adhesion and compatibility with wide range of coated and uncoated substrates
- Strict quality control procedures to ensure consistent and reliable products
- Low odor level

APPLICATIONS:

You can use the Sol 64 xp for most outdoor applications requiring light-fastness and/or water resistance, and also for indoor viewing applications.

SPECIFICATIONS:

COLORS: Cyan, Magenta, Yellow, Black, Light Cyan and Light Magenta

PACKAGING: 1000ml chipped cartridges, 1L bottles and 1L bags

PRINTER COMPATIBILITY: Fully compatible with Seiko™ 64S and 100S original inks.

SUBSTRATE COMPATIBILITY: Compatible with all standard substrates available on the market

PRINTING ENVIRONMENT: Temperature: 65°-86°F (18°-30°C); Relative Humidity: 20% to 70%
(no condensing)

STORAGE TEMPERATURE: Temperature: 50°-86°F (10°-30°C); Relative Humidity: 5% to 70%

SHELF LIFE: 12 months from production date

SAFETY DATA – please refer to MSDS

DISCLAIMER:

Plug & Play products are designed to facilitate easy ink changeover and not to work in conjunction with OEM inks for long periods of time. An ink changeover with a non-OEM requires a complete and full flushing of the printer. First with the normal flushing fluid currently used and then with the flushing fluid Sioen Digital™ Sol 64 XP. Despite of high color gamut compatibility in laboratory conditions the human eye might detect color variations, on certain media types, in specific light conditions. For best image quality and critical color matching, Sioen Digital™ recommends using dedicated color profiles.
